

The Cambridge

Unit 201

The open space and cathedral ceilings in the dining room and great room of this condominium provides a discreet buffer between the two bedrooms, while creating the perfect setting for casual entertaining. A cozy fireplace casts a warm glow during dinner in the cooler months while the private balcony is a tempting spot for dining alfresco during the summer. A master suite with cathedral ceiling, walk-in closet and master bath with shower, optional double sink vanity and optional whirlpool tub also features a second closet for additional storage. The bonus room above the attached garage would be ideal as a library, home office or hobby center.
