

The Fairfield

Unit 204

The stunning combination of the great room, dining room and kitchen, enhanced by an optional three-way fireplace and a generous optional snack bar, allow creative homeowners to define their space as needed. Sliding doors to the balcony fill the dining room with natural light, and a central hallway leads directly to the convenient laundry room and two sunny bedrooms. A cathedral ceiling, a private master bath and generous walk-in closet create the perfect master suite while a second spacious bedroom could easily double as a home office or den. The inclusion of a second walk-in closet offers the bonus of conveniently accessible storage space. Additional enclosed storage in the attached garage is integral to the livability of this thoughtfully designed condominium.
